

【修了生からひとこと】

Santi Nopnipa 君

タイ、スラナリー工科大学・工学部

研修期間:2011年9月26日～12月22日

The International Internship Program in Mie University has been a great experience for me. Thanks to Professor Yoshikatsu Ohta and assistant Professor Niwat Thepvilojanapong, Both specialists regarding network systems. I have acquired the necessary skills and learned to apply them through the project that my advisors assigned me. In my laboratory, the environment is very friendly and courteous and everybody offers to help each other. I really like Mie Prefecture and Tsu City, because the weather is very nice and people are well intentioned. Also, the natural scenery is fantastic and Japanese food is not only delicious but also good for the health. Finally I would like to thank the CIER for providing me with guidance and facilities during my stay.
